

CERIM Partnering Event

Budapest

Date: 5-6 May, 2011.

Topic

The mission of Central Europe Research to Innovation Models (CERIM) project is to develop adapted valorisation models for a more effective and efficient technology transfer from the universities and research institutes in Central Europe.

The project consists of ten technology transfer specialists and public research organisations, which form the test bed for the project which is implemented through the CENTRAL EUROPE Programme co-financed by the ERDF.

The investor conference gives the possibility for these institutes and their potential investors and distributors to get to know each-other – to build business and scientific relations enhancing the competitiveness of the represented Central European research projects and spin-offs.

The presented innovative projects are being developed in the cutting-edge research institutes of Central Europe and are having significant unexploited economic value. Interested partners will get a wide introduction of bright ideas that offer great opportunities to their future partners.
